IMPACT BEDS

DECREASE WEAR AND TEAR
**INCREASE
UPTIME**

Belt Tech Industrial's Impact Bed provides outstanding support, thereby reducing belt sag and encouraging effective sealing at load zones. These impact beds are designed to take a beating while at the same time providing a low-drag self-lubricating surface that reduces heat accumulation and undue wear on the belt.

All Impact Wedge Beds are available with optional rubber disc impact rollers in the middle.

Includes c-channel supports under all impact bars.

COMMON LENGTHS
24", 48" & 60"
