High Impact & High Tear Resistant Belts

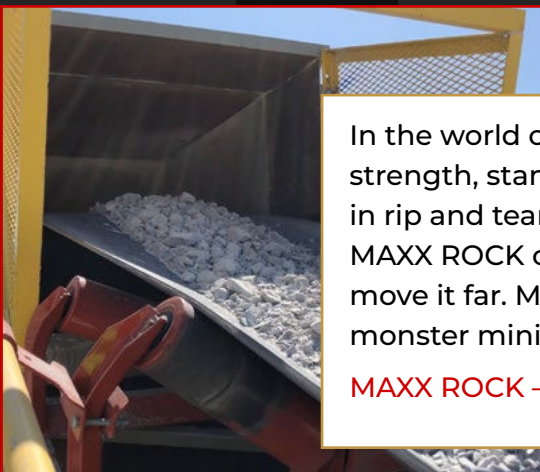

**MAXX AGNI®**  
Fire Resistant Belts

# MAXX TUFF

MAXX TUFF is one hardcore belt. Engineered to be virtually indestructible, it's built to withstand tough and rigorous material handling applications. Its hardcore construction and abrasion resistance take on the sharpest, gnarliest materials in stride. The advanced polymers and iron-clad compound shield it against brutal wear and tear, while its flexible core soaks up heavy impacts from hard rocks. No job is too extreme for this belt.

**MAXX TUFF - The bad boy of belting.**

# MAXX ROCK

In the world of heavy conveying, MAXX ROCK takes center stage. It has the strength, stamina and flexibility to handle heavy, sharp loads. With built-in rip and tear resistance, low elongation and tough-as-nails construction, MAXX ROCK combines all the qualities you need to move it heavy and move it far. MAXX ROCK delivers hardcore punishment protection for monster mining and recycling jobs while turning up production to 11.

**MAXX ROCK - A hard rock and heavy metal hero.**

# MAXX AGNI

MAXX AGNI belts revolutionize safety in combustible workplaces. Engineered with a proprietary blend of flame-retardant polymers, chemicals and additives, these belts are specially designed to extinguish fires and resist combustion. With certifications like MSHA Part 14, MAXX AGNI meets key standards for fire safety. Its anti-static construction prevents static build-up, while the robust, abrasion-resistant exterior withstands even the most punishing environments.

**MAXX AGNI - Saving more than your assets from fire!**
