SKIMMED BREAKER FABRIC

Fabric only available upon request

ABOUT

BTI Breaker Fabric brings reliable strength to every splice. This RFL-treated Leno Weave nylon fabric is coated on both sides with uncured rubber, creating a tough, flexible bond for step and finger splices. Built for clean application and dependable reinforcement, it's the fabric you reach for when you need every splice to hold strong.

FEATURES

Reinforces splices with serious strength and flexibility.

Skimmed on both sides for reliable, consistent performance.

Double-sided poly guards against contamination for a clean splice every time.

Color-coded for quick compound ID — orange, blue, yellow or red.

Built for hot vulcanized belt splicing across a range of rubbers — natural rubber, SBR, neoprene & more.

Strong choice for both step and finger splicing on standard fabric belts.

Dependable solution when you need a tough, even bond — every splice, every time.
