FABRIC BELT

# COVER STOCK

## ABOUT

Designed for vulcanized step and finger splicing, our **Fabric Belt Cover Stock** is an uncured rubber compound that replaces worn or damaged cover rubber on fabric conveyor belts. Engineered for high abrasion resistance, it delivers a strong bond to cured cover rubber across all standard fabric belt grades.

## KEY BENEFITS

Features a color-coded poly liner system for fast compound identification

For Natural Rubber (NR), Polyisoprene (IR), Styrene-Butadiene (SBR), Polybutadiene (BR), Polychloroprene i.e. - Neoprene (CR) rubber belt splices.

Prevents surface contamination with double-sided poly for clean handling

Extends the life of fabric belt splices

Improves resistance to wear, tear and impact
